

Exceptional Engineering Services

Our Unique Value Proposition

SolveITLabs has specialized in providing exceptional engineering services for Independent Software Vendors for 9 years. Our US based Project Managers (PMs) are highly experienced and work very closely with our clients to coordinate the development effort. We have 100 engineers located in two state-of-the-art development centers in Russia. Companies such as Sony, France Telecom and hundred of other leading companies use our services because we are very adaptable, scalable and professional.

"It's been a pleasure to work with such talented people. Their quality, price and performance are incredible."

Frederick J. Schrank
Vice President
Interkey.net

Our Services

Dedicated Developer

Ideal for those companies experiencing exponential growth and need dedicated development workforce for 12 months or longer. The dedicated developers become a transparent and natural extension of your IT development team.

Time and material

This is perfect for those projects that need competition quickly but might require some extra flexibility with testing and last minute feature requests.

Project Based

For those development efforts where you know what you need and you need it now.

Impeccable Technical Skills

Industry and Technical Expertise

You can trust SolveITLabs to deliver impeccable application programming services. We are experts at managing the highly complex, long-term engagements that our clients require because of our 9 year history of serving small, medium and large sized businesses. SolveITLabs can help your company create new opportunities for improvement by reducing the costs of managing applications by over half. We offer a wide range of technical services that can transform your business and technology operations to world-class excellence.

Dedicated to your Success

Unwavering Commitment

We adhere to the fundamentals of project management and the quality assurance principles of the Rational Unified Process - which calls for iterative development, sustainability to changes, careful QA, and risk management. We keep project goals in mind to decide on the most appropriate processes for the task at hand. Our development centers are equipped with state-of-the-art facilities and we use Web-based project management and collaboration tools to control project flow and provide a real-time interface to the work process for our clients.

"Solveitlabs developers are extremely professional and with deep knowledge."
